PROFILE

- Enthusiastic and detail-oriented Computer Science Engineering student (B.Tech, 2025) with practical experience in Full-Stack Development, Data Analytics, and Business Intelligence. Proficient in modern web technologies (React.js, Node.js, MongoDB, SQL) and data visualization (Power BI, Excel). Experienced in internships and academic projects that demonstrate the ability to design, develop, and deploy scalable applications. Strong communicator, quick learner, and adaptable team player seeking opportunities to contribute in a software development / data engineering role.

TECHNICAL SKILLS

Programming: Python, C, C++, Core Java, JavaScript, TypeScript, HTML5, CSS3

Frameworks/Libraries: React.js, Node.js, Express.js, Tailwind CSS, Three.js, React Three Fiber, Framer Motion

Data Analytics/Visualization: Power BI, Jupyter Notebook, Excel (Data Cleaning, ETL)

Developer Tools: Git, GitHub, VS Code, Agile/Scrum Basics

Databases: MySQL, MongoDB, SQLite, XAMPP

Core Skills: Full-Stack Development, REST API Development, Data Visualization, Problem Solving, Communication, Team Collaboration

EXPERIENCE

Data Analytics Intern.

May 2024 – July 2024

HP Computer.

Patna, India

- Cleaned and transformed large datasets (Amazon sales report) using Excel and ETL techniques.
- Built and deployed interactive dashboards in Power BI for sales performance tracking. .
- Conducted trend analysis and data-driven insights to support decision-making.)
- Gained corporate exposure and enhanced analytical and presentation skills.

Frontend Web Developer Intern

April 2024 – May 2024

Gauravgo Games Technologie

Remote, India

- Designed and developed responsive user interfaces (main, login, newsfeed pages) using React.js, HTML, CSS.
- Collaborated in Agile environment and improved practical knowledge of UI/UX best practices. Projects

PERSONAL PROJECTS

Portfolio Website | *Three.js, React Three Fiber, Framer Motion, React.js*

Aug 2023

- Developed a 3D interactive portfolio website showcasing skills and achievements using modern JS libraries.

Lifeline - Blood Bank Management System (MERN Stack) | *Node.js, Express.js, MongoDB, React.js*

June 2023

- Built a full-stack platform for blood donor registration and local search.
- Designed RESTful APIs in Node.js and integrated MongoDB database.

Bus Booking System | *Python (Tkinter), SQLite*

November 2022

- Developed a GUI-based bus reservation system with modules for seat availability, booking, and cancellation.
- Implemented persistent storage using SQLite and interactive UI with Python Tkinter..

EDUCATION

Jaypee University Of Engineering And Technology

Guna, India

Bachelor of Technology (B.Tech) in Computer Science Engineering

2021 – 2025

Sri Chaitanya Techno School

Visakhapatnam, India

Senior Secondary Certificate (CBSE)

2018 – 2020

CERTIFICATIONS

SQL Assessment – LearnTube

Issued June 24, 2024
